4 DYNAMICS: FORCE AND NEWTON'S LAWS OF MOTION

Introduction to Dynamics: Newton's Laws of Motion Motion draws our attention Motion itself can be beautiful, causing us to marvel at the forces needed to achieve spectacular motion, such as that of a dolphin jumping out of the water, or a pole vaulter, or the flight of a bird, or the orbit of a satellite

LECTURES IN ELEMENTARY FLUID DYNAMICS

Introduction It takes little more than a brief look around for us to recognize that fluid dynamics is one of the most important of all areas of physics—life as we know it would not exist without fluids, and without the behavior that fluids exhibit The air we breathe and the water we drink (and which makes up most of our body mass) are
